

ThyssenKrupp Materials (UK)

Big enough to know, small enough to care.

Already a market leader in stainless steel and aluminium, ThyssenKrupp Materials (UK) is expanding its MSS Division into the mild steel structural hollow sections market. Drawing on the experience and expertise of its sales team and back up by one of Europe's largest companies. We are able to offer a new source of supply in the UK for fully quality assured mild steel hollow sections and tubes in grade S355.

Circular Hollow Section

Cold formed grade S355 - 12m & 14m
Hot finished grade S355

Square Hollow Section

Cold formed grade S355 - 12m & 14m
Hot finished grade S355

Rectangular Hollow Section

Cold formed grade S355 - 12m & 14m
Hot finished grade S355

Hot Finished Seamless Circular Tubes

Grades E235 & E355

Centrally located in the West Midlands we can offer a nationwide delivery service of a full range of top quality mild steel products through ThyssenKrupp Materials Logistics, which employs over 100 people in warehousing and transport across the UK. Operating 46 vehicles ranging from pick-up trucks to articulated lorries.

In addition to UK situated stocks, we have full access to one of the most comprehensive ranges of both hot and cold formed grade S355 hollow sections at several sites in Europe.

Alongside this we are able to offer comprehensive rates for processing which includes in-house cutting and shot blasting and painting through our approved external partners.

All hot finished S355 materials supplied with mill certification to EN10204 3.1
