

ThyssenKrupp Materials (UK)

Catering to your every need...

ThyssenKrupp Materials (UK) are a proven and valued supplier to catering equipment manufacturers throughout the UK. Our extensive stock range of stainless steel, in all forms allows us to react to the ever increasing demands of our customers' supply chain. Our stock range for stainless steel includes the following:

Stainless steel sheet to EN 10088-2

0.5mm – 3mm thick in 2000mm x 1000mm / 2500mm x 1250mm / 3000mm x 1500mm

Grade 430, 304 and 316

Material held in stock in 240 Grit, 240 Silicon and Ultrabright polish

We are also able to offer the following services from our European service centre:

- Cut to length sheets from 500mm to 12,000mm long
- Non standard width blanks (762mm / 838mm)

We have also developed over 50 customer specific finishes that allow our customers products to excel in comparison to their competitors.

Grade 1.4509 (441) the low cost alternative to 304.

1.4509 offers a lot of the benefits of 304 with a considerable price saving due to the absence of nickel. These benefits include:

- Price stability.
- Cost advantage to 304
- Ease of fabrication similar to 304
- Good corrosion resistance
- Good low temperature properties
- Good high temperature properties

1.4509 is approved for contact with food and beverage products for both human and animal consumption and is an alternative worth considering for all involved in the catering equipment industry.

Stainless steel round tube

25mm OD x 1.2mm Wall – 100mm OD x 3mm Wall

Grade 304 and 316

Material held in stock in Satin and Bright polished.

Stainless steel square and rectangular tube

20mm SQ x 1.2mm – 100mm SQ x 3mm Wall

Grade 430, 304 and 316

Material held in stock in Satin polish.
